Technical Data Sheet

THE RESISTANT MATERIAL

INVICTA DL385 is a photosensitive material developed for general applications, industrial design and for the realization of functional parts, aesthetic mock up and design models. The material is particularly resistant.

It is available also in white colour (INVICTA DL395).

HINTS FOR THE DESIGN

INVICTA DL385 is suitable to produce functional parts. The models made of INVICTA DL385 are strong and slightly flexible.

THE INVICTA SERIES

The Invicta series includes all the materials suitable for the production of prototypes and functional parts. These materials are extremely accurate and precise and were developed inhouse by DWS.
